

August 8, 2023

Dear members of the Big Trout Condo Association,

Coming up in the later part of August or very early September, our association will be moving to a new keyfob/keycard access system for the Workout room and pool area. This is being done because the current system is no longer able to add or remove users out of the system and parts are not longer made for it.

In order to get the system up and running, we have contracted with Linx Integrated to get the system installed, which hopefully will happen in the next 3 weeks. This will require shutting down the pool and workout areas for 2 days to allow full installation of the new system and to allow our vendor to work uninterrupted. The dates of the closure will be sent out to all members as soon as we know when the vendor will be onsite and also when the equipment arrives.

A part of getting the system up and going will require issuing new cards to all condos in our association. We will be arranging for getting cards to our members. We will be issuing one (1) card to each condo. We will not need your old keyfob back as those fobs you currently have will not work with the new system. We will set up days for owners to come down to the pool area entrance to pickup their new card from us. Dates of when we will be handing out cards will be forthcoming once we know when installation will take place.

The system for owners will work very similar to how it is working now. Owners will touch their keycard to the reader on the wall and then the latch will unlock to allow the owner to access the pool and workout room. Hours of operation will still remain the same- 7:30AM-10:00PM for the pool & Spa and 24 hour access for the workout room.

Once we have concrete dates for installation, when the pool and workout areas will be shut down for installation and when keycards will be issued, we will follow-up with all owners by email.

We appreciate everyone's patience as we transition over to a new system.

Thank you!

Chris Lowe
